I am a visual artist from the beautiful Kashmir valley of India. I took art as the medium to cope up with the stress of my personal experiences of physical assaults, humiliation, unrest and suppression of freedom of speech.

I founded Callisto Art & Culture group to initiate the culture of organizing Snow Festival in India and is working to make it popular throughout the country. I pursued a Master's of Fine Arts (Applied Arts) from Jamia Millia Islamia, New Delhi.

I am also a Co-Founder & Creative head and Art & Culture Editor at **Kashmir Patriot**, Digital media Start-Up. I am a creative mind behind the multimedia stuff of the venture being fine arts professional. I have worked with Delhi based graphics & designing companies like **Positive Images Pvt Ltd., Iqra displays Pvt Ltd**

I am the captain of India's International Snow Sculpture team that participated in 'International Championship-2017-2018-2019-2023-2024 in United States and won Award for India.

### **I believe:**

**"Think of in venture as a way to make ideas happen."**

### **I say:**

Working as a designer for the past 3 years has taught him that no matter what you work on, each project is different and unique in its own way. The clients, the audience and the design combine to create a relationship between the user and the brand. As a designer, I enjoy inuencing that relationship with my strong design skills, aesthetics clarity and understanding of making principles.

I learnt to balance my creative vision with the limitations of designing for multiple languages. From directing photo shoot to design adverts, my role within the company encompassed many areas including corporate branding, brochure production, print design and other design projects as required.

I have designed for several other companies, including the Positive Images and Iqra Display as well as freelance for smaller companies. Each experience has helped me grow as a designer and as a person. I enjoy learning from my peers and I keep up to date with the latest methods. Aside from the usual Adobe standards like Illustrator and Photoshop, I use Corel Draw, Sketch up, 3D Max and several web tools like Flash, After-effect and more.
